1. Getting Started

ELEVAT3 is a coaching management app designed for personal trainers. It helps you log client sessions, track workout progress, manage schedules, and monitor active sessions in real time.

Installing the App

1

Download the ELEVAT3.apk file sent by your admin.

2

Open the APK file on your Android phone.

3

If prompted, tap Settings and enable "Allow from this source".

4

Return to the file and tap Install.

5

Once installed, open ELEVAT3 from your apps.

Logging In

1

Open the app — the login screen will appear.

2

Enter the email and password provided by your admin.

3

Tap SIGN IN.

4

You will be brought to your Coach Dashboard.

Tip: Your login credentials are set up by your admin. If you cannot log in, contact your gym administrator.

2. Dashboard Overview

The Dashboard is your home screen. It gives you a quick summary of your coaching activity and shows any active or upcoming sessions.

Dashboard Cards

Card	
Stats Grid	Total clients, sessions this month, attendance rate, revenue.
Active Session Timer	Live countdown for your current session. Appears automatically when you log a session.
Next Session	Your next scheduled client and how many minutes until they arrive.
Resume Workout	Green card — appears if you exited a guided workout mid-session. Tap to continue where you left off.
Availability Banner	Your current availability status. Tap to toggle on/off.
Announcements	Important messages from your gym.
Pull down on the Dashboard to refresh all data at any time.	

3. Managing Clients

The Clients tab shows all your active clients. You can view their profile, session history, and workout plans.

Viewing a Client Profile

- 1

Tap the Clients tab at the bottom of the screen.
- 2

Tap on any client name to open their profile.
- 3

View their contact info, session history, and notes.

Client Profile Sections

Section	
Overview	Name, contact, membership type, and birthday.
Sessions	Full history of logged sessions with duration and notes.
Workout Plans	Assigned exercises and programs.
Notes	Private notes visible only to you as the coach.
Strike Count	Number of missed/cancelled sessions. Alert at 3 strikes.

4. Logging a Session

After every client session, log it in the app to keep an accurate record of attendance, duration, and exercises performed.

How to Log a Session

1

From the Dashboard, tap the + button or go to Log Session.

2

Select the client from the dropdown list.

3

Set the session type (e.g., Strength, Cardio, General).

4

Enter the duration in minutes.

5

Add any optional notes about the session.

6

Add exercises by tapping Add Exercise — enter name, sets, and reps.

7

Tap LOG SESSION to save.

8

If you added exercises, you will be asked: "Start Exercises step by step?"

Once you tap LOG SESSION, the Session Timer will automatically start on your Dashboard. The countdown begins immediately.

Session Types

Type	
Strength	Focus on weights, resistance training, muscle building.
Cardio	Running, cycling, HIIT, or any cardio-based session.
Flexibility	Stretching, mobility, yoga-style sessions.
General	Mixed training or when no specific type applies.

5. Session Timer

The Session Timer appears on your Dashboard as soon as you log a session. It counts down the remaining time and alerts you as the session nears its end.

Timer Colours

Colour	
Green	Session is running normally.
Orange / Yellow	10 minutes remaining — prepare to wrap up.
Red	5 minutes remaining — your phone will vibrate as a reminder.
Time's Up! Alert	Session time has ended. Choose to Extend or End the session.

Timer Buttons

Button	
PAUSE	Freezes the countdown. Timer shows PAUSED. Use during breaks or rest periods.
RESUME	Restarts the countdown. Paused time is automatically added so you do not lose session time.
END	

Marks the session as complete. The timer disappears from your Dashboard.

EXTEND TIME

Adds extra time (+15, +30, +45 min, or custom). Shows a warning if it overlaps with your next client.

CANCEL SESSION

Removes the timer and deletes the session log. Use only if you accidentally started the wrong timer.

The timer keeps running even if you switch to another screen. You can always go back to the Dashboard to check remaining time.

6. Guided Workout

Guided Workout walks you through each exercise in a session step by step. It tracks sets, rest periods, and progress so you can focus on coaching.

Starting a Guided Workout

1

After logging a session with exercises, tap Yes when asked "Start Exercises step by step?"

2

The Guided Workout screen will open, showing the first exercise.

3

The session timer continues running on your Dashboard in the background.

During the Workout

1

The header always shows: client name, elapsed time, and exercise progress (e.g., Exercise 2 of 5).

2

Complete each set and tap DONE SET to advance.

3

After the last set, a rest timer begins automatically.

4

Tap SKIP REST to move on early, or wait for the timer to finish.

5

After rest, tap NEXT EXERCISE to continue.

When all exercises are done, tap FINISH.

Exiting and Resuming

Your workout progress is automatically saved every time you complete a set or exercise. If you need to leave the screen:

- Tap EXIT at the top of the screen.
- A green RESUME WORKOUT card will appear on your Dashboard.
- Tap it to continue exactly where you left off — even after closing the app.

The bottom tab bar is not visible during a Guided Workout. Always use the EXIT button at the top to return to the Dashboard.

7. Scheduling Sessions

Use the Schedule tab to book upcoming sessions with clients. Scheduled sessions appear on the Dashboard as your Next Session card.

Booking a Session

1

Tap the Schedule tab at the bottom of the screen.

2

Tap + New Session or an empty time slot.

3

Select the client and choose the date and time.

4

Add optional notes (e.g., bring resistance bands).

5

Tap SAVE to confirm.

Viewing Your Schedule

The Schedule tab shows all your upcoming sessions. Tap any session to view details, edit, or cancel it.

When you extend a session, the app will warn you if the new end time overlaps with your next scheduled client.

8. Tips & Reminders

Log sessions before they start

This starts the timer at the correct time and ensures accurate session records.

Keep the app open during sessions

The timer runs in the background, but keeping the app open lets you see alerts and vibrations in real time.

Use PAUSE during rest breaks

Pausing the timer means the client is not charged for break time. The paused duration is added back automatically when you resume.

Update your availability daily

Toggle your availability on the Dashboard so clients and your admin know when you are free.

Updates are automatic

When the admin releases a new version, the app updates itself in the background. Close and reopen the app to apply updates.

Strikes system

A client receives a strike for each missed or cancelled session. You will see a Dashboard alert when a client reaches 3 strikes.

Need Help?

If you encounter any issues with the app, contact your gym administrator. Do not share your login credentials with anyone.
